

- **Status:** exploration permit
- **Participation:** 100% OIL & GAS CAPITAL S.L.
- **Date of permit:** 18 May 2012.
- **Area:** 15,223 hectares.
- **Place:** Andalucía.
- **Basin:** Miocene Guadalquivir foreland basin.
- **Hydrocarbon expectations:** biogenic gas.
- **Reservoir:** Upper Miocene sandy turbidites (Guadalquivir Sandstones Fm.).
- **Seal:** marine shales from the turbiditic system.
- **Trap:** stratigraphic traps, channel-levee-lobe style turbiditic system.
- **Source rock:** Tortonian shales, found in numerous gas reservoirs that were discovered in the basin.
- **Exploration potential:** low.
- **Exploration risk:** very low.
- **Research depth:** less than 700 metres.
